Full-Stack Developer with experience building scalable web applications using React, Node.js, Express.js, and PostgreSQL. Skilled in developing responsive user interfaces, RESTful APIs, authentication systems, and database-driven applications. Passionate about solving real-world problems through technology and continuously learning modern development practices to build reliable and user-friendly software.

Technologies and Languages

- **Frontend:** HTML, CSS, JavaScript, React, Tailwind CSS
- **Backend:** Node.js, Express.js
- **Database:** PostgreSQL, MySQL
- **Tools:** Git, GitHub, Postman, VS Code

Education and Certifications

- **B.E. Computer Science and Engineering**, PSN college of engineering and technology **2023 – 2027**

Projects

- **URL Shortener Web Application**
Technologies : React, Tailwind CSS, Node.js, Express.js, PostgreSQL
 - Designed and developed a full-stack URL Shortener platform that generates unique short links for long URLs.
 - Implemented JWT-based authentication, allowing users to securely create, manage, and track their shortened URLs.
 - Added QR code generation and click analytics features to improve link sharing and monitor usage .
 - Built RESTful APIs, integrated PostgreSQL for data persistence, and created a responsive frontend using React.
- **Smart Task Management**
Technologies : HTML, CSS, Tailwind CSS, Javascript
 - Developed a responsive task management web application to organize and manage daily tasks.
 - Implemented CRUD functionality to add, edit, and delete tasks.
 - Used Local storage to store and persist user task data.
 - Added search and sorting features to easily filter and organize tasks.
 - Designed an interactive dashboard displaying total, completed and pending tasks.
